

Fugro Chance Inc. International Services

Fugro Chance's International Marine Division (IM) coordinates operations from our Houston office for business beyond the Gulf of Mexico. Providing fully integrated, multi-disciplined survey solutions internationally, we also act as a focal point and local liaison for other Fugro companies worldwide who have a client base in the USA.

While IM can cover many aspects of offshore survey, close liaisons with our sister companies allow a greater diversity of expertise, including:

Construction Support

- Pipelay Support
- Structure Installation
- Subsea Infrastructure Placement
- Metrology
- Pre-/Post-Route/Lay Surveys

Surface Positioning

Starfix® HP, Skyfix XP and G2 (Glonass)

Subsea Positioning

Ultra Short Base Line (USBL), Long Base Line (LBL) and Inertial Navigation Solutions (INS) for all manner of subsea positioning tasks.

Platform and Jacket Positioning

Positioning, orientation and attitude measurement for platform, jackets and other structure installations.

Rig and Vessel Positioning

Offshore positioning of drilling rigs and vessels for exploration and development drilling and geotechnical purposes.

Shallow Water Geophysical

Shallow water analogue and multibeam geophysical survey spreads for the performance of pre-engineering and pre-lay surveys, as-laid and as-built surveys, hazard assessments, and other marine survey requirements.

Cable Lay and Inspection

Real time eventing, catenary interface, and ROV support for cable lay and post lay inspection, and burial operations.

High-Resolution Sonar Imagery and Interpretation

Cost-effective subsea mosaic visualizations of hazards, deployed structures, and pipeline crossings.

DGPS Health Check and Gyro Verifications

Vessel DGPS health checks and gyro verifications in locations of your choice.

GIS Services

The creation and administration of spatial databases for field data management.

Knowledge and Experience

Knowledge of local working conditions, cultures, regulations, and local law are implicit factors in any successful overseas operation.

With Fugro's 75 offices and 13,500 employees in 50 countries worldwide, IM has unlimited resources to offer seamless survey support services.
